<p>†Helps protect against transmission of harmful UV radiation to the cornea and into the eye.</p> <p>*WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV- absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.</p>

BLINK STABILIZED® Design vs Prism/Peri Ballast Design	
Copy	
It can be challenging finding the right contact lens for you. With so many external variables that go into making a final decision, patients can feel comfortable that ACUVUE® OASYS 1-Day for ASTIGMATISM is the right choice. They incorporate four stabilization zones that work naturally with the eyelids, harnessing the power of the blink to help keep the lens in the correct position even in the toughest environments unlike traditional gravity dependent contact lenses ¹ . So you can feel comfortable knowing your vision stability will not be hindered ³ .

<p>Important information for contact lens wearers: ACUVUE® Brand Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye doctor. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness, or other eye problems. If one of these conditions occurs, remove the lens, and contact your eye doctor immediately. For more information on proper wear, care, and safety, talk to your eye care professional and ask for a Patient Instruction Guide, call 1-800-843-2020 or visit ACUVUE.com.</p> <p>©Johnson & Johnson Vision Care, Inc. 2021 PP2021MLT4605 </p>
